GLAD RIBBONS FOR 1947

First of all, I wish to thank my 1946 customers for their patronage, for their pictures of spikes grown from our stock and for their favorable comments in regard to the quality of stock received and service rendered. Only quality hand-cleaned inspected stock is shipped and I shall be glad to know if at any time our service and quality do not warrant your utmost satisfaction.

Every effort has been made to list varieties I know will give you modern ribbons of color, will win on the show table and will be good investments for the future. A gladiolus has passed the test if you find it in this catalogue and it has a definite use in the garden, the show or in commercial floral channels.

To Be or Not to Be

This seems to be a must for every cataloguer. In the past I have always thought you were the best judge and I still continue to have the same thoughts. A variety must satisfy a need of the grower and the florist, not the printer, if it is to be a worthy addition to the ever increasing gladiolus family, and live for more than a year or two. That is the basis of my growing and listing. Therefore, may I refer you to each variety for my comments. The varieties listed in greater detail and in advance of the general list are new glads which I believe have great future possibilities. All of them have proved themselves on the show table and some have already entered the commercial field. If you are a new grower and follow a few common sense cultural practices, the results in colorful gladiolus will be beyond your expectations.

DIP AND SPRAY

Dip the bulbs before planting in one tablespoon of Lysol mixed thoroughly with one gallon of water. Let them soak for six hours immediately preceding planting.

Spray your glads weekly after foliage is in the third leaf to kill thrips. Two ounces of tartar emetic, six ounces of brown sugar. Mix well with three gallons of water.

PLEASE READ BEFORE ORDERING

Minimum order \$3.00. Orders are prepaid. Payment in full before delivery of order. Please do not use currency for payment by mail. Extra bulbs or overcount on all orders. My 1946 customers say this is more satisfactory than a complicated discount and certainly more interesting.

Illinois State Department of Agriculture inspected flowers and bulbs.

Every precaution has been taken to send out only healthy bulbs true to name but no guarantee of growth or responsibility of the crop is included in the sale. A refund of the purchase price will be made on any order found unsatisfactory upon receipt and promptly returned.

Purchasers should examine express shipments carefully so as to file claim if received in damaged condition. All orders sent by mail at my own risk.

Early orders are the best policy and please do not send any orders for bulblets after April 1, 1947.

Order accepted subject to stock, and subject to being filled in numerical sequence. This listing cancels all previously listed prices.

It is with great pleasure I submit to you the following list with my best wishes for your success and a good growing season for this year. Remember an early order helps you and gives me more time to put in extras and to make an extra count.

THE AIR EXPRESS GLAD

The florist, the commercial grower, and the fan's gladiolus. The beauty of this flower is best described as a glistening light salmon pink, blending to a clear cream yellow throat. Modern color qualities which give instant appeal and assure its position in the gladiolus family.

A healthy form sport of Picardy that grows tall and opens 7 to 9 giant 6-inch ruffled florets. When cut tightly in bud the florets will open to the tip. Grand Champion and Most Beautiful at Ottawa, Illinois, in 1945. Best Recent Introduction and Reserve Champion at Ottawa, Ontario, Canada, in 1946.

You will eventually grow Kelsey and Silver Wings like you are now growing Leading Lady in quantity. Picardy sports of quality.

Price each, No. 1, \$4.00; No. 2, \$3.00; No. 3, \$2.00. Bulblets, 10 for \$4.00; 100 for \$32.00.

Grower's Unit—3 No. 1, 3 No. 2, 3 No. 3, 20 bulblets, \$28.00.

SILVER WINGS (Ritsema-Graff '44)

An ideal partner for Kelsey. A team in tune with the Air Express of today. Silver Wings needs no introduction as it has proved itself in the last three seasons. Glistening white Picardy sport with 6-inch florets with a light cream throat. Both Kelsey and Silver Wings have excellent propagating qualities.

Price each, Large, \$3.00; Medium, \$2.00; Small, \$1.50.

Bulblets, 10 for \$2.40; 100 for \$19.00; 1000 for \$75.00.

SUMMER GAL (Zimmer '44)

A large geranium pink with a rose feather in the throat. Ruffled, non-flecking, 6-inch florets on a tall spike. Opens up to 10 of the 18 to 20 buds. No tendency to crook, bulblet production and germination are excellent. Has great commercial possibilities and is hard to beat on the show table. I like the three varieties mentioned on this page and highly recommend them to you.

Price each, Large, \$5.00; Medium, \$4.00; Small, \$3.00.

Bulblets, 10 for \$4.00; 100 for \$40.00.

Grower's Unit "A"—3 Large, 3 Med., 3 Small, and 20 bulblets, \$35.00.

Grower's Unit "B"—1 Large, 5 Med., 10 Small, and 100 bulblets, \$70.00.

Yes, I am giving these three varieties a page again this year. If you attended the Ottawa, Ontario, Canada Show or the Binghampton, New York Show last August, you will know why I think so highly of these three varieties. They are tops in their class for show and commercials and it will be a long time before they will be challenged. They bloom from bulblets and really like to grow. It is a pleasure to own one of the best stocks of these gladiolus.

Note: There are some other varieties I list which I would like to include on this page, but space is limited so please check the General List carefully. It is an alphabetical listing of all the varieties I grow. I should be glad to know how my gladiolus grow for you.

THE AIR EXPRESS GLAD

Dominion Arboretum, Central Exp. Farm,
Ottawa, Ontario, Canada.

Ben B. Ruehr, R. R. 2, Freeport, Ill.

September 15, 1946.

Dear Sir:

Kindly reserve three bulbs of Kelsey for me. I may need a few bulb-lets, too, but send your price list as soon as it is ready. Kelsey was entered in the recent introduction class at our local show and easily took class honors. It failed to beat a marvelous Leading Lady for grand champion bloom, but took reserve champ prize. The Leading Lady was about 60 inches and held eight open, so it is small wonder that Kelsey failed to beat it.

Yours sincerely,

A. R. BUCKLEY,
Asst. Curator, Dominion Arb.

1947 Introductions

GOLDEN ARROW (Pruitt, Bastian)

A true light yellow with 18 buds, 8 florets open, 6 showing color. Grows 60 inches in the field, always straight. Formal type; the 5½ inch florets are well placed and firmly attached to stem. The buds, as they start to show color, are true yellow, and do not have the green cast as is common with most yellow Glads. Extremely healthy and vigorous, the foliage is very dark green. This is the yellow the commercial grower has been hoping for. Germination and propagation are excellent. Opens fine when cut tight and hot weather does not bother this Glad. Blooms in 85 days. Champion Three-Spike Seedling at the 1946 Springfield, Illinois, Show.

No. 1, \$3.00 each. No. 2, \$2.50 each. No. 3, \$2.00 each.

Bulblets, 10 for \$4.00.

Grower's Unit—3 No. 1, 3 No. 2, 3 No. 3, and 20 bulblets, \$25.00.

HIAWATHA (Beardmore, Graff)

Hiawatha is a large pure self scarlet. A flash of beautiful color on a wonderful formal spike that grew 60 inches in the field for me. Lightly ruffled 5½-inch florets with good substance placed right, on a spike of 22 buds with 8 wide open florets. This looks like one of the winners in future scarlet competition. A glad that is hard to fault and it is a very good propagator. The price is high but it is worth it. Price has been set by the stock available.

Price each, any size, \$10.00. No bulblets.

NEON (Young, Ruehr)

This Glad is a tuffy. Will try to bloom in a desert. A medium pink cut flower, formal type Gladiolus. A 100 per cent cutter of very good 50-inch right proportioned spikes with very good placing and heavy textured wide open florets. The florets measure 4½ inches with 8 to 10 open and 7 showing color on a 20-bud spike. Not a giant but just right for the floral trade. "Best Seedling" at Farmer City, Illinois, and Springfield, Illinois, in 1946. See cut on page 11.

Large, \$3.00 each. Medium, \$2.00 each. Small, \$1.00. Bulblets 10 for \$3.00.

Grower's Unit—3 Large, 3 Medium, 3 Small, and 20 bulblets, \$20.00.

PAYMASTER (D. S. Pruitt, Young)

This is a real royal purple Gladiolus with one narrow clear cream spear on each lip petal. An upright strong growing purple Gladiolus with 5½ inch plain wide open florets on a 60-inch spike with 18 buds, 6 florets open and 8 showing color. Flower head 28 inches, height in field 60 inches. A very good color. It has life, and it also is a fine upright straight grower. Bulblet production and germination are excellent.

Large \$3.00 each. Medium \$2.00 each. Small \$1.00. Bulblets, 10 for \$3.00.

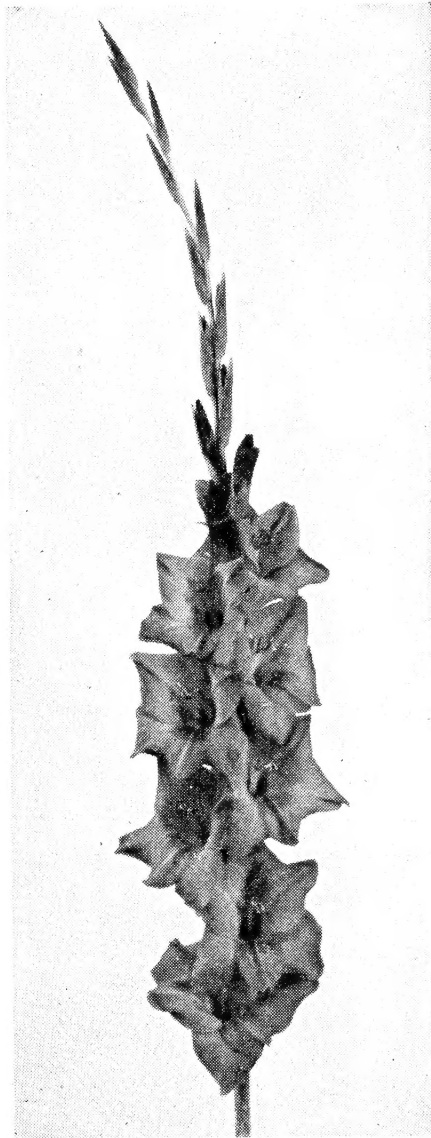

Grower's Unit—3 Large, 3 Medium, 3 Small, and 20 Bulblets, \$20.00.

WAR PAINT (Kadel)

A new scarlet which opens up to 10 large florets on a 22-bud spike. A Red Penny and Regent cross. Height 54 inches, flower head 27 inches. Because of its strong straight stem and long flower head, it makes an excellent garden Glad as well as cut flower variety. Blooms in 85 days. Does not burn or crook. Bulblets germinate well and make strong plants. Winner of the American Home Achievement Medal. Eight entries in shows of the last two seasons netted eight firsts, plus one special award.

1946 Introductions

CHANTILLY (Graff)

A light La France pink variety, formal exhibition type, with the ability to open 9 or 10 wide open 5 to 5½ inch florets. It grows to the height of 55 inches and produces an 18 to 20 bud spike. Grand Champion Seedling and Reserve Champion of show at Ottawa, Illinois, 1945. Bulblet production is good. A definite challenger of Connecticut Yankee.

Price each, any size, \$10.00. No bulblets.

CHRISTINE (Cave)

Christine and Bengasi are Cave's best. They both are future greats and will be grown in large quantities as soon as enough stock is available. My weakness is good whites and pinks, so I may be biased. Christine is a 6-inch, beautiful, plain petaled, recurved, white Glad with good substance and a stiff, strong stem. The stem is not thick or massive and it grows to a height of 56 inches. I like Christine and Chantilly.

Price each, any size, \$5.00. No bulblets.

CROWN ORCHID (Almey)

Plain wide open florets of deep lavender which open very well and grow on a tall vigorous plant. Similar to Sybil. Small bulbs produced large size blooms for me this year. This variety may prove to be a commercial lavender. Large size florets and the variety propagates very well.

Price each, Large, \$5.00; Medium, \$3.75; Small, \$2.50.

Bulblets, 10 for \$4.00; 100 for \$32.00.

DUSTY MILLER (Elliot)

Another good one from Canada. Smoky old-rose with distinctive cream lines. This glad is one of the best smokies I have grown. Large size, but not a giant, good grower and a perfect commercial spike. Darker than the average smoky. It is a good blend of color. I recommend Dusty Miller and you will grow it after you have seen it bloom. Also my wife's favorite.

Price each, Large, \$2.00; Medium, \$1.50; Small, \$1.00.

Bulblets, 10 for \$2.00; 100 for \$16.00.

MARTHA DEAN (Guille)

A distinguished, slightly ruffled yellow with a small red line running half way down the lower petal's rib. It blooms from bulblets and it is a good shipper and good cutter. A straight spike taller than average and the medium yellow blooms are of large size. Small bulblets that grow well.

Price each, Large, \$5.00; Medium, \$4.00; Small, \$3.00.

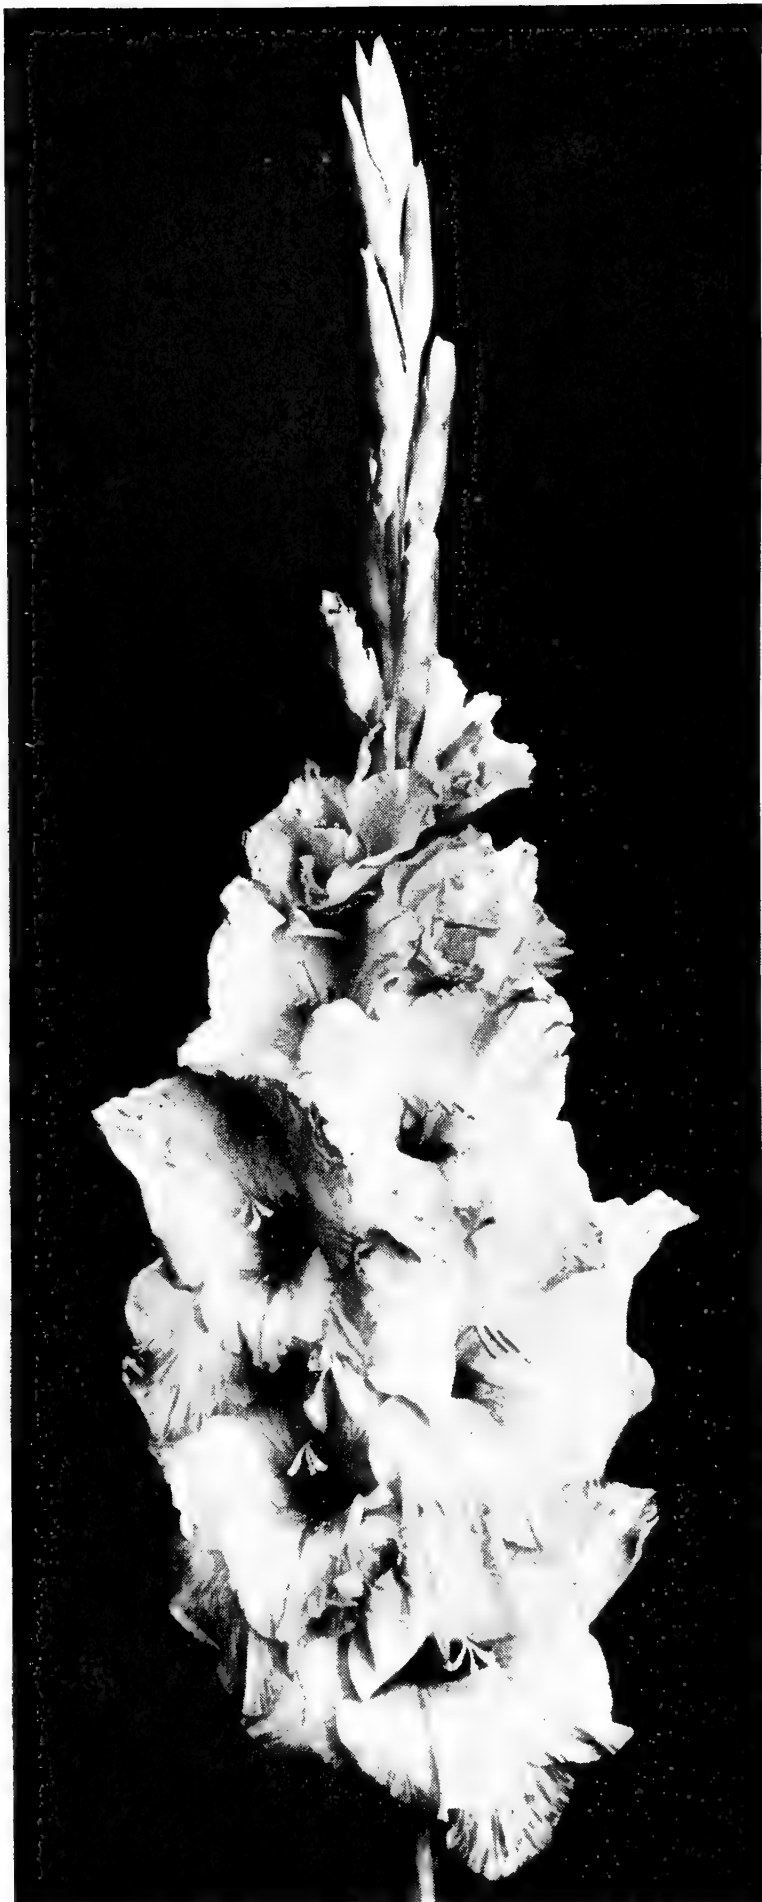

Bulblets, 10 for \$4.00; 100 for \$32.00.

RUBY RED (Young)

Color is what puts this variety in the list. Ruby Red best describes the color. Grows 20 buds having 8 open and most of the remaining buds in color on a spike that does not crook. It does not fleck in the field and it has very strong floret attachment. Most Open at Edwardsville, Illinois, in 1946. N.E.G.S. seedling award at LeRoy, Illinois, in 1945.

Price each, Large, \$2.00; Medium, \$1.00; Small, 50c.

Bulblets, 10 for \$2.00; 100 for \$16.00.

SUMMER GAL

We are always interested in testing seedlings, but please do not send any seedlings for test purposes which are not for sale or any that have not justified themselves in your own garden.

SUNLIGHT (Spiller)

Color again gives this variety merit. The orange colored florets have a deeper shade of orange at edge of the ruffled petals. Large sized florets and a very vigorous grower. Propagates freely and produces beautiful bulbs. The arrangement of the unopened buds on the spike is the only thing that does not appeal to me. The florists all want this one. It will be very popular with the commercial growers.

Price each, Large, \$3.50; Medium, \$3.00; Small, \$2.50.

Bulblets, 10 for \$4.00; 100 for \$32.00.

SYBIL (Zimmer)

A light hortense lavender that grows about 55 inches in height with from 18 to 20 buds. Five inch florets of light lavender with a feather on the lower throat with a small amount of peppering. Florets are firmly attached to the stem. They sometimes fleck a little darker but are usually clear. Seven to 9 florets will open at a time. Lighter than Crown Orchid but very similar.

Price each, Large, \$3.00; Medium, \$2.00; Small, \$1.00.

Bulblets, 10 for \$3.00; 100 for \$24.00.

WAX MODEL (Krueger)

Wax Model and Miss Wisconsin, two of Krueger's best introductions. Wax Model is a tall growing plant which blooms in early season from spikes that never crook. It opens 5 to 6 florets of 5 inches. The white florets of Wax Model carry a hairline of rose lavender which does not detract from its beauty. A very good commercial variety.

Price each, Large, \$5.00; Medium, \$4.00; Small, \$3.00.

Bulblets, 10 for \$5.00; 100 for \$40.00.
